EXAMINATION PAPER

The examination paper will be a question and answer booklet.

There will be 3 separate parts. One booklet for each of the following sections:

SECTION A (PERSONAL HEALTH) – QUESTIONS 1 – 4

- Question 1 will assess criterion 7. The time allocation is 10 minutes.
- Question 2 will assess criterion 1. The time allocation is 20 minutes.
- Questions 3 and 4 assess criterion 3 - students only need to answer ONE of these. The time allocation is 30 minutes.

SECTION B (HEALTH IN AUSTRALIA) – QUESTIONS 5 – 8

- Question 5 will assess criterion 7. The time allocation is 10 minutes.
- Question 6 will assess criterion 3. The time allocation is 20 minutes.
- Questions 7 and 8 assess criterion 2 – students only need to answer ONE of these. The time allocation is 30 minutes.

SECTION C (GLOBAL HEALTH) – QUESTIONS 9 – 12

- Question 9 will assess criterion 7. The time allocation is 10 minutes.
- Question 10 will assess criterion 2. The time allocation is 20 minutes.
- Questions 11 and 12 assess criterion 1 - students only need to answer ONE of these. The time allocation is 30 minutes.

Criterion 7 will be assessed 3 times (once in each part). Criteria 1, 2 and 3 will be assessed twice each (one 20 minute question and one 30 minute question).

- Questions 1, 5 and 9 have a shortened time frame compared to previous years but remain the same type of question. Past examination papers are a useful guide.

- Questions 2, 6 and 10 have a lengthened time frame compared to previous years but remain the same type of question. Past examination papers are a useful guide.

Students must include units when using data (eg. per 100,000 population).

When students use an acronym not used in the question, they must write it in full in the first instance for clarity (eg. World Health Organisation, WHO).

We strongly recommend students bring a basic and/or scientific calculator, ruler and an unannotated dictionary into the exam (see TASC calculator guidelines).

- Students will be asked to provide evidence / data to support their response
